Waste Brine Processing REGULATED WASTE FACILITY

The recently approved QBMC project is the only regulated waste facility (RWF) in Australia permitted to process waste brines into industrial chemical products.

ABOUT QBMC

QBS BRINE MANAGEMENT COMPLEX

OVERVIEW

The QBMC is a fully permitted regulated waste facility, located at the intersection of key regional infrastructure at Crossroads in the Western Downs in Queensland, Australia.

FUNCTIONS

The QBMC enables the safe and efficient processing:

- of a range of complex waste brines & salts, and
- converts these wastes into industrial chemicals.

ADVANTAGES

A permanent liquid waste management solution.

CAPACITY

Whilst the QBMC is being developed in stages, the permitted liquid waste processing capacity (stages 0 & 1) is currently 2.4 million litres per day (ML/d).

TIMELINE

The processing of waste brine at the QBMC project is planned to commence in late 2027, with larger processing capacity to become available in 2028.

DEVELOPER

The QBMC is being developed by Parkway Corporate, a leading Australian industrial wastewater technology company listed on the ASX since 2011.

Additional details about group capabilities are outlined in the Parkway Group [Capability Statement](#).

INTEGRATED SOLUTION

The QBMC is being developed in collaboration with established partners to provide a **fully integrated waste management solution** for industry.

CSG

Coal Seam Gas - Derived Brine

The QBMC is the only regulated waste facility (RWF) in Australia:

- permitted to process CSG derived waste brine and salts, and
- capable of converting these wastes into valuable industrial chemicals (products), a beneficial use pathway required by the existing regulatory framework in Queensland, Australia.

Additional details are outlined in the *CSG Regulatory Framework Review* report published by Onward on 20 August 2026.

Get in touch to explore how the QBMC can assist in debottlenecking your operations, reducing financial liabilities and managing long-term environmental risks.

REGISTERED SUITABLE OPERATOR

The registered suitable operator number for Queensland Brine Solutions Pty Ltd issued by Queensland Government is: 100774599.

INVITATION FOR EXPRESSIONS OF INTEREST

QBS is progressing commercial arrangements for QBMC. Parties seeking to procure brine processing solutions or to partner with QBS are invited to get in touch.
